dtSearch Desktop with Spider – single user

Requires Windows

Single user license: a single individual may use the software on up to two computers, so long as the software will be used on both computers exclusively by that individual. In a terminal server environment, each terminal server user counts as a separate user. For successive installs on multiple different machines for forensics, e-discovery and similar investigative usage, please see dtSearch Desktop “investigative” license below.

single user @ \$199 _____

dtSearch Desktop with Spider – annual single user “investigative”

Requires Windows

Annual single individual user “investigative” license: this is an annual license covering use for one year by a single individual for forensics, e-discovery and similar investigative usage. A single individual may install, uninstall and reinstall the software successively on multiple different machines, provided that the software must be fully uninstalled on the previous machine prior to installation on another, so the software is only installed on one machine at any given time. In a terminal server environment, usage for each terminal server counts as a separate installation. This license also includes an additional dtSearch Desktop with Spider single user license for personal usage. All other installations for either indexing or searching require additional licenses.

annual single user “investigative”
@ \$999 covering one year _____

dtSearch Network with Spider

Requires Windows

Pricing is non-concurrent: a 100-seat license covers up to 100 individual users in a single organization operating either in a shared network environment or as separate users (e.g. for laptops). In a terminal server environment, each terminal server user counts as a separate user. In addition to the number of specified user computers, dtSearch Network multi-user licenses cover usage of the software on a single additional machine for indexing and/or for shared network index access. All other installations for either indexing or searching — including temporary forensics and e-discovery installations — require additional licenses.

dtSearch Web with Spider

Requires IIS

Technical support covers dtSearch Web with Spider only. **Technical support does not cover C++, Java, COM, .NET and other APIs.**

Server definition: each physical machine, including all load balancing, backup, testing and development machines, counts as a “server” for licensing. For multi-server licensing, please see the dtSearch Engine.

dtSearch Engine for Other Platforms

Requires programming

Contact dtSearch for royalty-free and other options.

dtSearch Publish – "Publish 250"

Requires Windows

"Publish 250": covers use of dtSearch Publish to create up to 250 "search-only" (without end-user indexing) portable media of **identical content**, distributable to up to 250 total users.

- All portable media copies must contain the same identical content under this option.
- The "search-only" portable media may run in an individual-usage capacity only, and not from a shared-access server such as IIS.
- This license includes a single user license of dtSearch Desktop for index building; additional copies may be separately licensed.

"Publish 250" @ \$2,500 _____

Special Web "Combo": "Publish 250" plus one server dtSearch Web with Spider @ \$2,995 _____

dtSearch Publish – "Annual Service Bureau"

Requires Windows

"Annual Service Bureau": is a \$3,500 **annual license** covering **one year** of "search only" (without end-user indexing) portable media publishing from **one location**, with **portable media content as set forth below**.

- The content must fall into one of the following categories: (i) confidential e-discovery or forensically retrieved data; (ii) confidential business transaction documents; (iii) data that Licensee has OCR'ed as a "service bureau" for Licensee's clients; (iv) subject to written approval by sales@dtsearch.com, other similarly narrow topics (oil rig specifications, cardiovascular information, airline regulations, etc.).
- Portable media mastering must occur at a single physical location.
- The "search-only" portable media may run in an individual-usage capacity only, and not from a shared-access server.
- An annual license renewal is required to cover usage beyond the initial year's period.
- This license includes a single user license of dtSearch Desktop for index building; additional copies may be separately licensed.

"Annual Service Bureau" @ \$3,500 covering one year _____
